

# Netlogix - Establishment of Nexus Logistics

We wish to congratulate our client, Netlogix, on the successful establishment of Nexus Logistics - a joint venture with Ports of Auckland Limited. Nexus Logistics will provide independent container logistics services throughout New Zealand, targeting the import/export sector. The basic premise of the alliance is to reduce wasted capacity exacerbated by empty truck and container movements out of import dominant Auckland to meet export container requirements. Netlogix chief executive, Chinthaka Abeywickrama, says developing the Wiri freight hub and improving the mix of road, rail and coastal transport will create a more efficient flow of traffic across the country. Partner, Michael Busch, led the team from Lowndes Jordan in structuring, negotiating and documenting the joint venture arrangements.
